The Mephisto is a Roby Junior 2 without the board feeder. With its simple operation and changeover time close to zero, the Mephisto is the ideal casemaker for short runs.

The basic version consists of a vacuum worktable, which prevents the sheet from moving during the placing of boards, a manual board positioning device and an automatic turning-in and pressing unit. A backlit window enables accurate positioning of the book title along the spine.

Optional equipment includes: a gluing unit for hot and cold glue, a corner cutter, a device for automatic corner closing and the roller press function (without turning-in).

Optional equipment:

- compressor
- corner cutter
- corner closing device
- device for 5-piece covers
